### Postage and packaging

Item location: Newcastle upon Tyne, Tyne and Wear, United Kingdom

Dispatches to: N. and S. America, Europe, Asia, Australia

Postage and packaging	To	Service	Estimated delivery*
£1.50	United Kingdom	Royal Mail 1st Class Standard	4-5 business days after seller receives cleared payment

\*The estimated delivery time is based on the seller's dispatch time, the postal service selected, and when the seller receives cleared payment. Sellers are not responsible for shipping service transit times. Transit times may vary, particularly during peak periods.

#### Domestic dispatch time

Will usually dispatch within 3 working days of receiving cleared payment.

### Return policy

Products can be returned within 30 days of purchase where a refund or replacement will be provided. If you have any problems please contact us first before returning the item.

### Payment details

Payment method	Preferred/Accepted
	PayPal Preferred
Personal cheque	Accepted

### Seller's payment instructions

Payment must be received within 5 working days after auction. If paying by cheque, funds must clear before I dispatch item.

## Seller's description

### Semiconductor Voltage Stabilizer For Classic Cars

The CCVS1 classic car voltage stabilizer is designed to replace both two and three terminal bi-metallic contact breaker voltage stabilizers used on a large number of classic British cars manufactured in the 50's, 60's and 70's.

It uses the latest semiconductor technology to provide your vehicle with a stable 10v supply for accurate gauge readings.

A vehicles supply voltage varies considerably depending the state of charge of the battery, the engine speed and the loads, such as any lamps and motors, that are operating. The Fuel, Temperature and Oil gauges all work by measuring a voltage put out by a sender that responds to fuel level, water temperature or oil pressure respectively. Hence, any variation in the supply voltage will cause changes in the readings of the gauges.

By replacing this device with the classic car voltage stabilizer a stable 10v will be supplied to your gauges whatever your vehicles supply voltage. With the additional benefits of thermal overload protection and short circuit protection to prevent damage to your guages.

The device will work with the majority of classic cars: **MG (including: MGB, Midget), Triumph (including: Spitfire, GT6, TR4/5/6, Stag, Dolomite), Jaguar, Lotus, Rolls Royce, Daimler, Austin, Morris, Ford (Cortina, Escort, Capri, Anglia) or any other classic car that has a 12V negative earth electrical system.**

It connects directly to the original wiring of many cars including MGB/C, Midget, Spitfire and many more. Adaptor leads are provided for other applications.

The CCVS1 stabilizer is designed for 12v NEGATIVE EARTH vehicles.

We also manufacture stabilizers for 12v positive earth vehicles (CCVS2) and can manufacture to your requirements.

The stabilizer comes in a robust moisture proof enclosure complete with adaptor leads and comprehensive installation instructions.

**\*\* Please note auction is for one stabilizer not two as shown in the picture \*\***

### Technical Data

Input Voltage: **11.5 to 35.0 Volts**

Output Voltage: **10 Volts** +/-5%

Line regulation: **10 mV** (typical)

Load Regulation: **12 mV** (typical)

Operating temperature: **0 to 125 degC**

Storage temperature: **-65 to 150 degC**

Dimensions: **30mm x 20mm x 15mm.**

The CCVS1 employs internal current limiting, thermal shut down and safe operating area protection.

Moisture proof enclosure.

**Some recent feedback regarding the Stabilizer:**

Excellently made item at a stunning price, Who needs more !  
Fantastic piece of kit. Worked very well with Smiths gauges on my Scimitar SE5a  
Excellent. Goods arrived as described with great instructions. Recommended A++++  
Superfast smooth transaction. Excellent communications. 1st class seller.  
Item recieved quickly with full instructions and works. Many thanks  
Excellent goods and service! many thanks!  
Superb quality item. Fast, smooth transaction. Recommended seller. A++++++  
Brilliant. Good product, low price, quick delivery. Couldn't ask for more.  
Good response and fast turn around time - would re use...  
Well packaged & received promptly. Many Thanks  
Excellent product, arrived very speedily - Mk1 GT6 here we come.  
Good communication and FAST delivery. Superb service.  
Ultra-fast dispatch of item. Many thanks. Would recommend this Ebayer.
